Voitsberg/Hannover, November 2013

AGRITECHNICA 2013:

Bauer Pump Tanker BLITZ

Bauer, the pioneer of modern slurry technology

The agricultural engineering company Bauer from Voitsberg, Austria has expanded its product range by a new series of slurry tankers, the "BAUER BLITZ". This new pump tanker is the all-rounder among the slurry tankers, available as single axle tanker in sizes from 5,000 litres to 10,000 litres and as tandem axle tanker in sizes from 6,000 litres to 16,000 litres.

„The aim was to find an alternative to the vacuum tanker in order to profit from all the advantages of the eccentric spiral pump produced by the BAUER Group: big suction depth, high suction power and hence short filling time, 100% filling of the tanker, smooth running eccentric spiral pump as well as highly precise distribution," explains Bauer product manager Franz-Peter Roll.

Combined with the original Bauer slurry gun and completed with various options from Bauer's extensive product range, the customer disposes of a tanker for universal use and highest requirements. With this tanker, a new product is available to farmers complying with all economic and technical demands.

Once again Bauer has proven its pioneering role in the sector of modern slurry technology with a product range from submersible motor mixers via the pumps of the Magnum series to efficient slurry distribution and separation technology.

Visit us at Agritechnica from November 10th to 16th **hall 16 (slurry) – booth C 17!**

The Bauer Group at a Glance

Since its foundation in 1930, the BAUER Group - headquarters in Voitsberg, Styria, has been focused on irrigation and slurry management technology. Whilst initially producing wastewater and slurry pumps, the company first became an international player in the sector of irrigation technology in 1947 with the patent-protected Bauer lever lock coupling - named after Rudolf Bauer, the company founder. Today the company is developing rapidly in the biotechnology sector with wastewater treatment & biogas plants and it is focusing on three main sectors: irrigation management, waste management as well as energy management.

BAUER is the Global market leader in irrigation technology: A total of more than 2,5 million hectares is globally irrigated. A major part of sales representing 50% of the total turnover is achieved in the sectors of slurry and environmental waste processing. The BAUER Group exports to more than 90 countries of the world. With approx. 530 employees, Bauer made a turnover of about 167 million Euros in 2011/2012. With an export ratio of 90%, the main markets of the BAUER Group are Germany, France, the CEE countries, China, the USA, South-America and Australia.

The BAUER Group currently consists of 17 companies worldwide.

Product Range

- Various irrigation systems
 - Automated pivot and linear systems, i.e.: Centerstar, Centerliner, Linestar
 - Irrigation machines, i.e.: Rainstar, Duostar, Rainboy or ProRain
 - Traditional irrigation, i.e.: pipe systems and solid-set plants
- Slurry transportation (slurry tanks)
- Innovative slurry treatment: mixers, pumps, separators, composting and distribution
- Pipes and fittings
- Wastewater treatment and separation technology for the food and paper industry
- Components for Biogas plants
- BRU Bedding Recovery Unit

Internet Services

- Configuration of all machines
- Ordering of all spare parts
