## Press release

Voitsberg/Hannover, November 2013

AGRITECHNICA 2013:

### **Transport Tanker on Hook Lifting Frame for Wider Range of Use**

Bauer offers tanker technology for the municipal and industrial sector

**The Bauer Group has gone one step ahead in the development of its slurry tankers: starting out from the well-proven quality of its slurry transport technique, the Austrian manufacturer of agricultural equipment has developed a hook lifting frame for a flexible use of the superstructure. This new accessory allows for a field installation of the tanker and widens hence its range of use.**

"Based on the reputable high-quality products of Bauer made, we have enlarged the functional range of tanker superstructures by the option to separate the tanker from the chassis by means of a hook lift," explains Norbert Kopp the idea behind the concept which covers tanker sizes ranging from 10.000 to 16.000 litres with a frame length of 6 to 6,5 metres. The transport superstructures are available as single- or double-chamber tankers and optionally they can also be designed as compressor tankers offering a variety of compressors of different size and models. Thus a wide range of customers' requirements can be fulfilled, from simple hydraulically driven compressors to water-cooled industrial compressors with heat exchanger, thermostat and many other features. They allow for a continuous operation as needed, for instance, for municipal facilities. Of course the protective equipment necessary for the operation of a compressor is integrated.

In addition to the traditional functions of a slurry tanker, the models equipped with hook lifting frame can be used easily as transport tankers in the municipal and construction sector. Hook lifting tankers have also been built for fire departments. For that end, the tanker can be equipped optionally with a hydraulically actuated filling dome or with a docking device for synthetic hoppers mounted either at rear or on top of the tanker so that the slurry can be sucked over to a distribution vehicle without problems. A wide range of accessories is available on demand.

Visit us at Agritechnica from November 10<sup>th</sup> to 16<sup>th</sup> **hall 16 (slurry) – booth C 17!**

**The Bauer Group at a Glance**

*Since its foundation in 1930, the BAUER Group - headquarters in Voitsberg, Styria, has been focused on irrigation and slurry management technology. Whilst initially producing wastewater and slurry pumps, the company first became an international player in the sector of irrigation technology in 1947 with the patent-protected Bauer lever lock coupling - named after Rudolf Bauer, the company founder. Today the company is developing rapidly in the biotechnology sector with wastewater treatment & biogas plants and it is focusing on three main sectors: irrigation management, waste management as well as energy management.*

*BAUER is the Global market leader in irrigation technology: A total of more than 2,5 million hectares is globally irrigated. A major part of sales representing 50% of the total turnover is achieved in the sectors of slurry and environmental waste processing. The BAUER Group exports to more than 90 countries of the world. With approx. 530 employees, Bauer made a turnover of about 167 million Euros in 2011/2012. With an export ratio of 90%, the main markets of the BAUER Group are Germany, France, the CEE countries, China, the USA, South-America and Australia.*

*The BAUER Group currently consists of 17 companies worldwide.*

**Product Range**

- *Various irrigation systems*
  - *Automated pivot and linear systems, i.e.: Centerstar, Centerliner, Linestar*
  - *Irrigation machines, i.e.: Rainstar, Duostar, Rainboy or ProRain*
  - *Traditional irrigation, i.e.: pipe systems and solid-set plants*
- *Slurry transportation (slurry tanks)*
- *Innovative slurry treatment: mixers, pumps, separators, composting and distribution*
- *Pipes and fittings*
- *Wastewater treatment and separation technology for the food and paper industry*
- *Components for Biogas plants*
- *BRU Bedding Recovery Unit*

**Internet Services**

- *Configuration of all machines*
- *Ordering of all spare parts*
